

SportReach

Simplifying Recreational Sports

Reduce Complexity and cut costs for the sports & events you manage. Sport-specific registration landing pages and easy to use online tools make switching to SportReach hassle-free and better for your athletes and staff.

Managing team and individual sports together within one organization is not easy. Promoting event(s), securing resources, gathering registrations and waivers from teams, then managing all of the operations and financial complexities is hard. SportReach makes it easier and significantly less expensive to manage dozens or hundreds of different sports and clubs on one platform.

How SportReach Solves Complex Sports Challenges

We enjoy solving hard problems. North Carolina Amateur Sports (NCAS), one of the National Congress of State Games (NCSG) 34 State Games organizations, had a big problem in 2017.

NCAS hosts 32 different sports events each year. Each sport has a unique registration process, promotion needs, schedules and financial requirements. NCAS was using dozens of registration providers, financial systems and website platforms to manage their sports and games. After working together to understand all of their unique sport needs, together we built ONE platform that managed every single sport and event. NCAS now manages tens of thousands of registrations and hundreds of thousands of revenue dollars using the SportReach dashboard.

In the eight years since, we've introduced over 30 of the NCSG games organizations to SportReach. Together we've built the best multi-sport management platform in the world.

Don't ask us, ask our customers
